

ALUCOPANEL® U.S.A FR A2

EN 13501-1 A2-s1, d0 | ASTM D1929 450 degrees, ASTM E84 Class A

ALUCOPANEL® U.S.A FR A2 is the non-combustible aluminum composite panel innovated by Alucopanel Middle East LLC subsidiary of the Danube Group, UAE. The product has achieved **Class A2-s1, d0** when tested in accordance to **European Standard EN 13501-1**. The inorganic **core materials** of the product has been tested separately and achieved **Class A** in accordance to **American Standard ASTM E84**, also product has undergone the self & flash ignition test and achieved ignition temperature **450°C** in accordance to **American Standard ASTM D1929**, International building fire code including UAE requires minimum self ignition temperature for ACP/MCM should be 345°C. Hence the product meets with all the toughest fire regulation while retaining the possibilities for the concept and design of buildings, it allows simple processing, weatherproofing and above all non-combustible.

“First & Only Manufacturer of
A2 GRADE
Aluminum Composite Cladding
Materials in Middle East”
